

Chapter 7: Authentication

Learning Bluemix & Cognitive

Bob Dill, IBM Distinguished Engineer, CTO Global Technical Sales

Chapter 7: Creating a secure application

- SSL
- Sessions
- Cloudant
 - Storing session information
 - Storing userIDs
- Responding to the user:
 - no userid
 - no password
 - not registered
 - userid password don't match
 - success!!
- Enabling your app to dynamically detect local or bluemix environments

The screenshot shows a web application interface. At the top, there is a black navigation bar with the text "Zero to Cognitive Tutorial" on the left and "Home", "Erase Name", and "Log Out" on the right. Below the navigation bar, the main content area has a light gray background. The title "Chapter 7: Authentication and sessions" is displayed in a large, bold, teal font. Below the title, there are two input fields. The first field is labeled "Please Enter your User ID" and the second field is labeled "Please enter your password". Both labels are in a small, teal font. Below the input fields, there are two blue buttons: "Log In" and "Register".

New in index.js

Modules

```
12
13 var cookieParser = require('cookie-parser');
14 var session = require('express-session');
15 var cloudant = require('cloudant');
16 var myDB = require('./controller/restapi/features/cloudant_utils');
17 myDB.authenticate(myDB.create, '');
18 var sessionBase = require('./controller/sessionManagement');
19 var sessionStore = Object.create(sessionBase.SessionObject);
20
```

Environment

```
var sessionSecret = env.sessionSecret;
```

Tests

```
if (cfenv.getAppEnv().isLocal == true)
```

Paths

```
app.get('/login*', function (req, res) {console.log("login session is: "+req.session); loadSelectedFile(req, res);});
```

```
router.post('/auth/authenticate*', auth.authenticate);
router.post('/auth/register*', auth.register);
router.post('/auth/logout*', auth.logout);
```

Session persistence

```
app.use(cookieParser(sessionSecret));
app.use(session({
  store: sessionStore,
  secret: sessionSecret, resave: false, saveUninitialized: true,
  cookie: {secure: true, maxAge: 24*60*60*1000},
  genid: function (req) {return uuid.v4()}
}));
```

New files

- index.html updated

  }
  return("");
}
```

The Plan: 30 minute Chapters with an hour or two of practice

- | | |
|--|---|
| 1. The Story, Architecture for this app | |
| 2. Setting up Bluemix | |
| 3. Building your first Watson App | (Watson Speech to Text) |
| 4. Getting Watson to talk back | (Watson Text to Speech) |
| 5. Understanding Classifiers | (Watson NLC) |
| 6. Creating a custom dialog with Watson | (custom Q&A, session management) |
| 7. Authentication | (puts C2 thru 6 together) |
| 8. Alchemy News | (Watson Alchemy) |
| 9. Visual Recognition and Images | (Watson Visual Recognition) |
| 10. Watson Conversations | (Watson Conversations) |
| 11. Rank & Retrieve | (Watson Alchemy + Rank & Retrieve) |
| 12. Getting started on my first client prototype | Design Thinking, Stories, Architecture, Keeping it simple |

Chapter 8: Understanding Alchemy News

Learning Bluemix & Cognitive
